EXPERIENCE

Backend Engineer

Scaylor AI | August 2025 – Present

- Designed, developed, and deployed a scalable data ingestion infrastructure on GCP using Terraform, ensuring GDPR compliance with EU-only resource policies, CMEK encryption, and secure IAM configurations.
- Led the development of an NL→SQL pipeline leveraging Vertex AI for schema extraction and dataset-aware prompt formatting, enhancing SQL safety through validation and BigQuery cost checks.
- Architected and implemented a unified data tooling system with a Cursor-like IDE interface, enabling AI-powered data analysis, schema reconciliation, and conflict resolution.
- Engineered and deployed Workload Identity Federation across 18 GCP projects, securing customer access to data buckets and consolidating billing to a master account via Terraform and gcloud.

Software Engineer

Concan Consulting Corporation | April – June 2025

Senior Lecturer of Mathematics

Vanderbilt University | August 2023 – August 2024
